PROFESSIONAL SUMMARY

Results-driven **Software Quality Assurance Engineer with 5+ years of experience** in manual and automated **software testing and quality control (QC)** for **FinTech and banking products**. Proven track record designing and executing end-to-end test strategies across mobile (iOS & Android) and web/desktop platforms, with deep expertise in **Selenium, Appium, Postman, SoapUI, JMeter, JIRA, and Zephyr**. Skilled in **API testing, performance/stress testing, regression testing, smoke testing, exploratory testing, and defect lifecycle management**. Currently contributing to high-scale financial platforms at **Galileo Financial Technologies** — the Latin American division of **SoFi Technologies** (US-based FinTech unicorn), originally joined through **Technisys** prior to its acquisition — having achieved a **15% reduction in production defects** through improved critical test coverage and root cause analysis. Experienced in **CI/CD continuous testing pipelines**, with a collaborative mindset, strong **Agile/Scrum** background, and solid programming skills in **Python, C#, and SQL**. Recognized for building internal **AI-powered QA tools** at Galileo — including a **multi-format test case generator** (PDF, video, Excel, Figma MCP integration) and an **automated Zephyr reporting analyzer** — measurably reducing test design and delivery cycle times.

TECHNICAL SKILLS

Test Automation

Selenium WebDriver/IDE · Appium · Katalon Studio · Python (pytest) · C#

API & Performance Testing

Postman · SoapUI · REST API Testing · Apache JMeter · Load & Stress Testing · Endpoint Validation

CI/CD, Dev Tools & Languages

Git · GitHub · GitHub Actions · Jenkins · CI/CD Pipelines · Python · C# · SQL · MySQL · PostgreSQL · MongoDB · VS Code · Android Studio

AI & Internal QA Tooling — [Developed at Galileo](#)

AI-Powered Test Case Generation · LLM Integration · Figma MCP · Multi-format Input Processing (PDF, DOCX, HTML, MP4, Excel, Screenshots) · Zephyr Report Automation · Stakeholder Report Generation · Internal Tool Development

Currently Training — [In Progress](#)

Kotlin & Jetpack Compose (Native Android Development) · Flutter / Dart (Cross-Platform Mobile Development)

Testing Types

Manual & Automated · Regression · Smoke · Exploratory · Functional · Non-Functional · Mobile (iOS/Android) · API · Performance · UAT · Integration · E2E Testing

Test Management & QC

JIRA · Zephyr · Test Case Design · Test Planning · Test Strategy · Test Coverage · Defect Lifecycle Management · Root Cause Analysis (RCA) · SDLC · STLC

Domain & Methodologies

FinTech · Banking · SaaS · Agile/Scrum · Kanban · Android · iOS · Web · Desktop · Cross-Platform Testing · Cross-Browser Testing · Payment Flows

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer

Galileo Financial Technologies · SoFi Technologies (ex Technisys)

August 2022 – Present

Buenos Aires, Argentina (Remote)

Projects: Banco Macro · Banco Nación · Banco Patagonia

- ▶ Designed and executed **manual and automated test cases** for core banking SaaS products across **Android, iOS, and Desktop** environments.
- ▶ Performed **API testing and service integration validation** using Postman and SoapUI, ensuring reliability and correctness of critical financial service endpoints.
- ▶ Managed the full **defect lifecycle** (creation, triage, tracking, closure) in **JIRA and Zephyr**, maintaining clear traceability between requirements and test execution.
- ▶ **Achieved a 15% reduction in production defects by improving test coverage of high-risk and critical business scenarios.**
- ▶ Led **regression testing, smoke testing, and release validation** cycles across multiple environments, ensuring zero critical regressions in production deployments.
- ▶ Collaborated in **CI/CD continuous testing workflows**, integrating automated test suites into deployment pipelines; monitored logs and performed **root cause analysis (RCA)** to reduce MTTD for production incidents.
- ▶ **Engineered an internal Zephyr Cycle Summary reporting tool** that automatically parses exported test cycle data and generates detailed QA metrics reports, eliminating manual effort and significantly reducing reporting and delivery time.
- ▶ Developed an **AI-powered test case generation platform** supporting multi-format inputs (plain text, PDF, DOCX, HTML, screenshots, MP4 videos, Excel test suites, and Figma mockups via **Figma MCP integration**) — enabling automated generation, editing, and export of structured test cases and **stakeholder-ready QA scope reports**, directly cutting test design cycle times.

Quality Assurance Analyst

Find The Lead

January 2021 – August 2022

Buenos Aires, Argentina

Project: iFX Network

- ▶ Conducted **requirements analysis and functional test case design** for SaaS product features, ensuring full coverage of user stories and acceptance criteria.
- ▶ Built and maintained **test matrices**, executed test cases, and performed **UAT validation** for web and mobile (Android, iOS, Desktop) applications.
- ▶ Reported and tracked **defects and incidents** in JIRA, with full traceability through Office documentation and reporting tools.
- ▶ **Reduced critical bug response time through optimized defect triage and communication processes between QA and development teams.**
- ▶ Executed **functional, exploratory, and stress testing** across Android, iOS, and Desktop environments, and led the **implementation of automated stress testing** practices.

Quality Assurance Tester

FPay (iFX Network / Banco Falabella)

December 2018 – January 2021

Buenos Aires, Argentina

Projects: Banco Falabella · FPay

- ▶ Executed **functional and non-functional tests** for mobile (iOS/Android) and web/desktop applications in the financial sector.

- ▶ Validated **transactional use cases and end-to-end payment flows**, ensuring correctness and compliance with business requirements.
- ▶ **Led the implementation of automated stress testing practices, increasing test efficiency and coverage for performance-critical scenarios.**
- ▶ Analyzed **functional requirements**, documented test results, and produced comprehensive QA reports for release sign-off.

Quality Assurance Tester

Freelance / Self-Employed

February 2018 – November 2018

Buenos Aires, Argentina

- ▶ Performed **manual functional testing** for web and mobile client applications, covering requirement analysis, test case design, and defect reporting.
- ▶ Produced QA documentation, process diagrams, and improvement proposals for multiple client engagements.

EDUCATION

Bachelor's Degree in Digital Technologies (Licenciado en Tecnologías Digitales)

In Progress

Universidad de la Ciudad de Buenos Aires (UNICABA)

Expected graduation: 2027

Higher Technical Degree – Software Analysis, Development & Programming

Graduated

I.S.F.D. y T. N°93 Pte. Arturo Illia

Técnico Superior en Análisis, Desarrollo y Programación de Software · 2025

High School Diploma – Economics & Organizational Management

Completed

Victoria High School (Colegio Superior Victoria)

Bachiller en Economía y Gestión de las Organizaciones

CERTIFICATIONS & COURSES

- ✓ CertiProf

Scrum Foundation Professional Certificate (SFPC) · Remote Work Professional Certificate
- ✓ EducaciónIT

Software Tester QA · Test Case Analysis & Design · Testing Automation with Selenium
- ✓ CodersHouse

Agile Methodologies (Scrum & Kanban) · UX/UI Design
- ✓ UTN (Universidad Tecnológica Nacional)

Professional Testing Master Avanzado
- ✓ Udemy

Master in Katalon Studio Automation · SQL Databases · Master in Python · Selenium with Python & PyTest · Apache JMeter · Master in Java · Master in Web Development
